enerfab
BUILT FOR THE CHALLENGE

DATA CENTERS

Data Center Partner with Multi-Craft Capabilities

Our goal is to provide predictable outcomes for our customers. We achieve this through our in-house pipe and steel fabrication shops, prefabrication and modularization program, unmatched quality craftsmanship, as well as being one of the largest union employers in the Midwest.

Enerfab is committed to supporting our customers' speed-to-market needs with:

- Labor Resources with Local & National Reach
- Integrated Supply Chain Management & Strategic Sourcing
- Geographic Scalability & Connective Shop Network

Speed-to-market differentiators:

- Multi-craft capabilities include pipefitters, boilermakers, millwrights, ironworkers, electricians, operating engineers, laborers, bricklayers, and more
- In-house pipe and steel fabrication
- Single source, vertically integrated prefabrication/ modularization program
- Positioned to scale both onsite crews and prefabrication capacity
- Precision with consistently tight tolerances for 'Perfect Fit-Up' in the field
- Industry-leading safety and quality programs
- Capability to store, stage, and ship just in time

Core Capabilities for Data Centers

Fabrication:

Our in-house steel and pipe fabrication shops support Enerfab's capabilities in providing fabricated pipe spools, precision steel and pipe fabrication, as well as module and skid assembly.

Prefabrication & Modularization:

Enerfab has facilities dedicated to modular fabrication through our connected network of shops and will scale these facilities to match our customers' capacity and location needs. Having in-house steel and pipe fabrication under the same executive management teams enables a streamlined modular fabrication and assembly program. In addition, Enerfab provides engineering and design support, pipe design, and structural analysis.

Modular Capabilities:

- Process Skids
- Multi-Trade Racks & Trestles
- Prefabricated Process Equipment

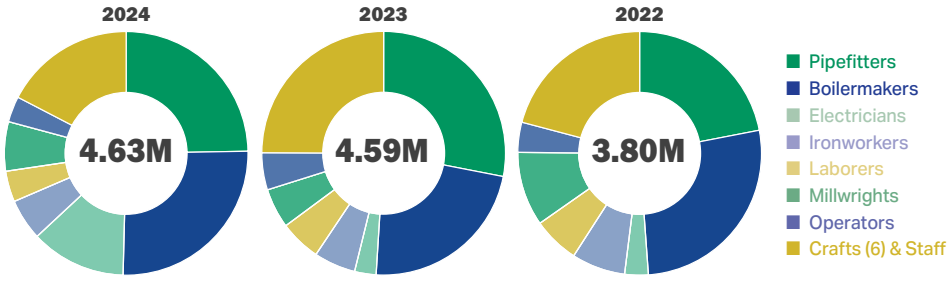

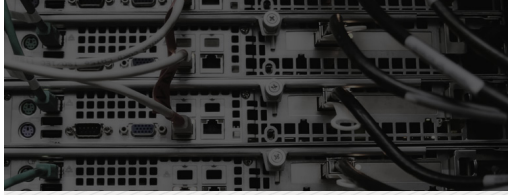

Construction:

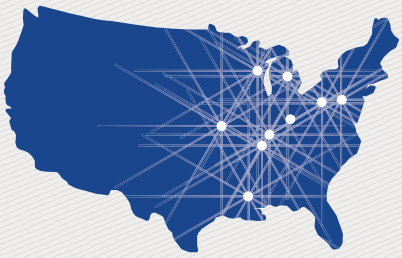

In addition to our fabrication and modular capabilities, we clocked over 4.63 million labor hours in the field in 2024. Our single-source approach enables efficiency and eliminates disputes between shop and field teams. Enerfab's construction capabilities include:

- Capital Projects
- Mechanical
- Electrical
- Structural Steel
- Modularization Installation

Geographic Scalability

Project Support:

- 750,000+ square feet of shop space
- 12 locations
- Strategically located network of pipe and steel fabrication shops

Technology:

Utilizing state-of-the-art technology to build smarter projects

- 3D Laser Scanning for Prefabrication
- Procore Construction Management
- Real-Time Project Management Tools

ESQ Safety and Quality in Everything We Do

Enerfab Safety & Quality

Our safety and quality programs are a testament to the commitment of every employee to adopting our behavioral-based approach to both. Employees are equipped with the agency and responsibility to speak up and identify hazards and possible quality issues before they happen.
